

Guidelines for Authors

Special issue in *Superconductor Science and Technology* relating to papers presented at the 11th International Superconductive Electronics Conference to be held in Washington DC on 10–14 June 2007.

The aim of this special issue in *Superconductor Science and Technology* is to present a comprehensive state-of-the-art of superconductive electronics and small-scale devices. The issue will include both theoretical and experimental aspects of the following areas: digital circuits and systems, RF electronics, quantum computing, thin film materials and junctions, SQUIDs and their applications and mixers, and detectors and novel devices.

To maximise the scientific impact of this special issue, only original research papers will be considered for inclusion.

How to submit a paper to the focus issue

Our preferred method of submission is through the web. Please go to <http://authors.iop.org/>

From this page you can choose one of the following:

Authors with a personal IOPP author homepage

From the authors.iop.org web page you should select 'login' and submit your article in the normal way. Authors with a personal IOPP homepage can, if they wish, speed up the reviewing procedure by choosing to build their own PDF online as part of the submission process.

Authors without a personal IOPP author homepage

From the authors.iop.org web page you should select the 'Submit an article' link which will guide you through our submission process. This procedure will send your files to our Electronic Submissions team who will process your files and forward them to *Superconductor Science and Technology*. Once this is done, a personal homepage will be set up for you, providing access to extra services. Further details will be supplied by email.

Please note: when completing the submission web form please include the words 'ISEC07' in the special issue details field (which is about halfway down the form). The submission deadline is 14 June 2007 but we would appreciate it if you could send us the paper earlier if possible.

Further information on how to prepare your article for submission can be found on <http://authors.iop.org/> 'Guidelines for Authors' link on the left.

If you have any queries, questions or suggestions about electronic submissions, then please contact our Electronic Submissions team on esubs@iop.org

Guest Editors for this special issue are:

Dr Donald Miller (donald.l.miller@ngc.com), Professor Fred Wellstood (well@squid.umd.edu) and Professor Donaldson (sust@iop.org),

Publisher: Dr Thomas Miller (sust@iop.org)
